

OPTI HiLo - Adjustable Height Lectern

Opti is proud to release the world's first metal adjustable lectern, which complies with all EU regulations on access and facilities for the disabled.

A correct height lectern is vital for better eye contact with an audience, it improves posture and therefore the confidence of the speaker.

The OPTI HiLo lectern adjusts effortlessly from Hi to Lo (and all heights in between) allowing the lectern to be used by people of all sizes and ages.

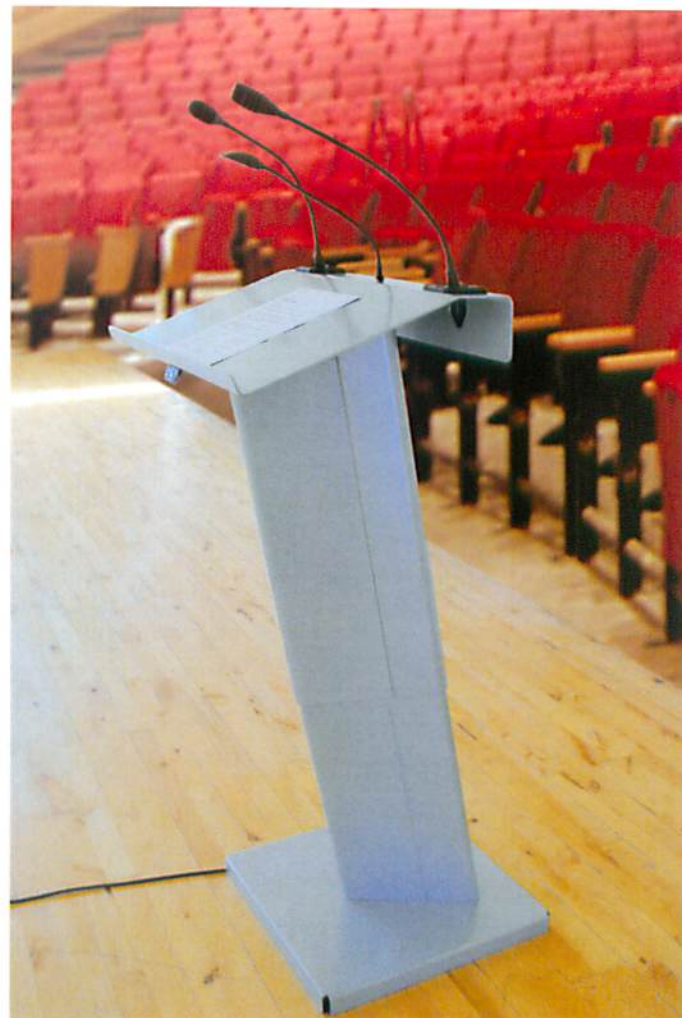

For wheelchair bound speakers the height is easily adjustable from the sitting position by just a touch of the conveniently placed switch.

The HiLo Lectern is supplied with a removable gooseneck low voltage light and 2 isolation mounted microphone sockets, into which can be plugged the speaker's microphone of choice.
